
The Semantic Web Iswc 2010 9th International Semantic Web Conference Iswc 2010 Shanghai China N

introduction to semantic web technologies & linked data - semantic web technologies a set of technologies and frameworks that enable the web of data: resource description framework (rdf) a variety of data interchange formats (e.g. rdf/xml ,n3 ,turtle ,n-triples) notations such as rdf schema (rdfs) and the web ontology language (owl) all are intended to provide a formal **introduction to the semantic web - world wide web ...** - 1 introduction to the semantic web (tutorial) 2009 semantic technology conference san jose, california, usa june 15, 2009 ivan herman, w3c ivan@w3 **the semantic web - inria** - semantic documents and ... for the semantic web to function, computers must have access to structured collections of information and sets of inference rules that they can use to conduct automated reasoning. artificial-intelligence researchers have studied such systems since long before the web was developed. **metcalfe's law, web 2.0, and the semantic web** - metcalfe's law, web 2.0, and the semantic web james hendler 1 jennifer golbeck 2 1 rennselaer polytechnic institute 2 university of maryland, college park hendler@cs.rpi, jgolbeck@umd abstract: the power of the web is enhanced through the network effect produced as resources link to each other with the value determined by **semantic web and the libraries: an overview** - their semantic web activity pagew3c states : "the idea of having data on the web defined and linked in such a way that it can be used by machines not just for display purposes, but for automation, integration and reuse of data across various applications. **knowledge representation for the semantic web** - p. hitzler, m. krötzsch, s. rudolph: knowledge representation for the semantic web, ki 2009 semantic-web-book 3 what is a rule? • logical rules (predicate logic implications) **semantic web: revolutionizing knowledge discovery in the ...** - semantic web technology is being increasingly used to implement solutions that overcome many of the obstacles to the development and integration of web services resources. this trend includes initiatives by the world wide web (w3c) consortium's semantic web health care and life sciences interest group (hclsig) [15]. **international semantic web conference guide (v. 3.2)** - international semantic web conference guide (v. 3.2) the conference guide is aimed at organizations who wish to bid to host a conference in the international semantic web conference series. the international semantic web annual conference introduction in 2002 the semantic web science association (swsamanticweb) **knowledge graph refinement: a ... - semantic web journal** - the cyc knowledge graph is one of the oldest knowledge graphs, dating back to the 1980s [57]. rooted in traditional artificial intelligence research, it is a curated knowledge graph, developed and main-tained by cycorp inc.7 opencyc is a reduced version of cyc, which is publicly available. a semantic web **which semantic web? - csdl.tamu** - the semantic web writ large, the view that holds it to be the resource of personal agents forming the backdrop for a latter-day knowledge navigator. 2.1 taming the web one of the early visions of the semantic web arose as a reaction to the disorder of the web. the web was and is not ordered in a **semantic web application areas** - semantic web-enabled web services which will help to bring the semantic web to its full potential 1. introduction the world wide web (www) has drastically changed the availability of electronically accessible information. the www currently contains some 3 billion static documents, which are accessed by over 300 million users internationally. **a semantic web primer - university of crete** - primer-cr 2003/10/1 page xi list of figures 1.1 a hierarchy 11 1.2 intelligent personal agents 15 1.3 a layered approach to the semantic web 18 2.1 the tree representation of an xml document 31 **the semantic web in teacher education - eric** - the semantic web will become more prevalent and prominent in educational settings in the next four to five years (czerkawski, 2012). the three advantages of the semantic web listed by maddux, liu, li and sexton (2011) are: "1) an aid to **rdf, jena, sparql and the "semantic web"** - the linked data web or the semantic web. as tim berners-lee writes [2]: "if html and the web make all online documents look like one huge book, rdf, schema, and inference languages will make all the data in the world look like one huge database." and, in fact, there exist rdf browsers like **introduction to the semantic web** - introduction to the semantic web before going deeper into our technologies, expertise and so on, we need to have a basic idea of the main concept behind them. this concept is used everywhere in our documentation - "semantic". for example, "ontotext is a leading developer of core semantic technologies". so, what do **example semantic web applications - mit** - example semantic web applications introduction other lessons address what the semantic web is, what are key characteristics of a semantic web application, and where its strengths lie compared to most traditional technologies (coming soon!). this lesson presents several specific, successful examples of semantic web applications in order to **a semantic web business case - world wide web consortium** - a semantic web business case jeff pollock, oracle corporation on behalf of the w3c semantic web education and outreach interest group terms like "semantic web," "web 3.0," and the "data web" have been interchangeably used to describe the underlying vision behind **information retrieval and the semantic web** - information retrieval and the semantic web tim finin1, james mayfield2, anupam joshi1, r. scott cost2 and clay fink2 university of maryland,1 baltimore county baltimore md 21250 usa the johns hopkins university2 applied physics laboratory **python programming | semantic web** - python programming | semantic web what is semantic web? semantic web = triple data structure (representing subject, verb and

object) + uris to name elements in the triple data structure **software engineering on semantic web and cloud computing ...** - software engineering on semantic web and cloud computing platform radha guha, ph.d, uci radhaguha@yahoo anaheim, ca 92807 abstract: tim berners lee's vision of the semantic web or web 3.0 is to transform the world wide web into an intelligent web **word knowledge: semantic feature analysis** - national center on intensive intervention semantic feature analysis—5 . semantic feature analysis sheet . this handout will serve as a guide for students as they learn how to use semantic feature analysis. the grid includes key words (left column) that relate to the features of a topic in the text (top row). **the semantic web - information sciences institute** - the semantic web w3c's tim berners-lee: "weaving the web": "i have a dream for the web... and it has two parts." • the first web enables communication between people - the web shows how computers and networks enable the information space while getting out of the way **semantic web services - stanford university** - semantic web services framework. it is composed of semantic markup of web services, user constraints, and web agent generic procedures. in addition to the markup, our framework includes a variety of agent tech-the authors propose the markup of web services in the daml family of semantic web markup languages. this markup enables a wide variety of **ontologies and the semantic web - school of informatics** - • web was "invented" by tim berners-lee (amongst others), a physicist working at cern • his vision of the web was much more ambitious than the reality of the existing (syntactic) web: • this vision of the web has become known as the semantic web what is the semantic web? **unlocking the potential of public sector ... - semantic web** - unlocking the potential of public sector information with semantic web technology harith alani1, david duplaw1, john sheridan2, kieron o'hara1, john darlington1, nigel shadbolt1, and carol tullo2 1 intelligence, agents, multimedia school of electronics and computer science **querying the semantic web - csonybrook** - @ semantic web primer sparql basic queries sparql is based on matching graph patterns: the simplest graph pattern is the triple pattern like an rdf triple, but with the possibility of a variable instead of an rdf term in the subject, **automatically constructing semantic web services from ...** - automatically constructing semantic web services from online sources 19 discovery method that mines a corpus of tagged web sources from the social bookmarking site del.icio to identify sources similar to a given source. for example, given a weather service that returns current weather conditions at a **learning ontologies for the semantic web** - the semantic web relies heavily on the formal ontologies that structure underlying data for the purpose of comprehensive and transportable machine understanding. therefore, the success of the semantic web depends strongly on the proliferation of ontologies, which requires fast and **ontology learning for the semantic web - computer science** - the semantic web ontology learning for the semantic web alexander maedche and steffen staab, university of karlsruhe the semantic web relies heavily on formal ontologies to structure data for com-prehensive and transportable machine understanding. thus, the proliferation of ontologies factors largely in the semantic web's success. **e-resource management and the semantic web: applications of ...** - the e-resources management handbook george macgregor erm and the semantic web: applications 3 taken together the subject-predicate-object triple represents a statement of fact about the resource in question and characterizes the nature of the relationship between each node of the directed graph. **cse 595 - semantic web - csonybrook** - (c) paul fodor (cs stony brook) and elsevier course description 2 "semantic web is an extension of the world wide web through standards by the world wide web consortium (w3c). the standards promote common data formats and exchange protocols on the web, most **semantic search - computer science** - semantic search, semantic web 1. the semantic web the semantic web is an extension of the current web in which information is given well-defined meaning, better enabling com-puters and people to work in cooperation. it is the idea of having data on the web defined and linked in a way that it can be used for **semantic web for earth and environmental terminology** - semantic web for earth and environmental terminology (sweet) rob raskin jet propulsion laboratory 4800 oak grove dr pasadena, ca 91109 abstract-the semantic web for earth and environmental terminology (sweet) is a prototype for improving the **editor: steffen staab the semantic web revisited** - editor: steffen staab university of koblenz-landau staab@uni-koblenz the semantic web exception of vannevar bush, 1 although even he might have thought the scale of achievement extraordinary. today, the world wide web links 10 billion pages, and search engines can divine themes embodied in the links to serve useful and **what happened to the semantic web?** - the promise of the social-semantic web • the semantic web as the ideal platform for distributed social networks and social media • connect digital identities across networks (sameas) • connect distributed conversations across networks • having a profile in one network, and linking it to content elsewhere **ontoedit: collaborative ontology development for the ...** - ontoedit: collaborative ontology development for the semantic web 223 fig.1. the semantic portal at the institute aifb seal is a framework for managing community web sites and web portals based on ontologies. the ontology supports queries to multiple sources, but beyond that it **syllabus - santa clara university** - semantic searching on web. 3. practice examples of semantic web programming and open source semantic web tools, and implement example semantic web applications. 4. read current research papers and implement example research group project in semantic web. 5. explore the next generation of semantic extraction, tagging automation, **machine learning methods of mapping semantic web ontologies** - page | 1 machine learning methods of mapping semantic web ontologies caden howell chowell4@studentspaul

november 22, 2008 abstract this paper is an overview of the application of machine learning to ontology mapping at a high level. **semantic web in 10 years: semantics with a purpose - stko** - the mission: interoperability semantic web in its most general aim is about interoperability being needed in almost all areas of research and businesses – it is just not called like this in most cases. **ontologies and the semantic web** - the aim of the semantic web [3], the ultimate goal being to allow data to be shared effectively by wider communities, and to be processed automatically by tools as well as man-ually".4 the classic example of a semantic web application is an automated travel agent that, given various constraints and preferences, would offer the user suitable ... **making secure semantic web - unisce** - semantic web, a web resource's metadata makes it possible to evaluate its appropriateness for a given query, which in turn will lead to greater efficiency of web ensure that all of the layers of the resource allocation, despite the daily expansion of web space. as in [11], we can **scalable semantic web data management using vertical ...** - the semantic web is an effort by the w3c [8] to enable in-tegration and sharing of data across different applications and or-ganizations. though called the semantic web, the w3c envisions something closer to a global database than to the existing world-wide web. in the w3c vision, users of the semantic web should **semantic web applications - haystackail.mit** - on the semantic web. the semantic web hints at a solution to some of these problems. it offers a single unified data model powerful enough to hold all of the information currently scattered among multiple applications and the metadata annotations can be used to select relevant information. but merely unifying the data is insufficient. **semantic web - 123seminaronly** - semantic web 2 automatically by tools as well as manually. the semantic web facilitates deployment of machine power in this correlation and usage of data. at its core, the semantic web is comprised of a philosophy, a set of design principles, and a variety of enabling technologies such as the resource description framework **d 1.2.4 architecture of the semantic web framework** - the semantic web framework is intended to help semantic web application developers build semantic web applications and solve all these problems. it is a reference framework that: • describes the existing types of semantic web technologies, their functionalities, and the dependencies between these technologies. **a semantic web based framework for social network access ...** - recently, semantic web technologies such as resource de-scription framework (rdf) and the web ontology lan-guage (owl) have been used for modeling social network data [11]. although our goal in this paper is not to propose new semantic approaches for modeling online social network data, we would like to give a brief overview of current ap-**download dictionary of xml technologies and the semantic ...** - 1952928. dictionary of xml technologies and the semantic web springer professional computing. ricerca), il marketing turistico: la relazione con il cliente. per le scuole, il dado e l'alfabeto. **search on the semantic web - umbc ebiquity research group** - search on the semantic web differs from conventional web search for several reasons. we describe the sources of these differences which will manifest themselves in the design of swoogle [13], the first search engine for the semantic web that we have created. first, semantic web content is intended to be published by machines for **security aspects in semantic web services filtering** - semantic web services in enterprise information systems was created to meet users' requirements and enhance semantic web services with machine processable security information. this article presents how this security ontology can be integrated into the web service description and how it enhances the process of web services filtering. 1 ...
