
Triticale A Promising Addition To The Worlds Cereal Grain Report

evaluation of grain yield stability of superior triticale ... - study of stability of superior triticale lines, this investigation was conducted at two stations in two growing seasons. this study was assigned in randomized complete block design with 3 replications. each experiment consists of 18 promising lines and cultivars of triticale in addition of two checks of triticale: et-79-17 and sanabad. **zinc application method impacts winter triticale in ...** - winter triticale is a very promising cereal crop for russia. triticale grain has higher level of lysine than winter wheat. lysine is an essential amino acid in human nutrition and plant proteins usually have insufficient levels of lysine. baking properties of triticale are not as good as soft wheat, but **evaluation of wheat promising lines under on-farm conditions** - testing triticale promising line recommended et-83-18 new line can be replaced by juanillo-92 old cultivar under birjand and similar areas conditions of iran. the objective of this research was evaluation wheat grain yield promising lines of c-89-6, c-89-7 and c-89-15 and comparison of them with mihan as **triticale : a new grain crop? - researchlibraryric.wa ...** - promising lines are harvested to provide bulk seed for yield testing at three sites in the cereal growing areas. as seed is multiplied, more extensive testing is carried out. the most promising lines emerging from these tests are included in a large number of variety trials planted each year throughout the agricultural areas of the state. **the application of triticale malt as the substitute for ...** - the aim of this work was the investigation of wort production for beer by the application of triticale malt as a partial substitute for barley malt in grist. for wort production three series of experiments were carried out in which malts produced from three different triticale varieties were used as the substitute for barley malt in grist. **analysis of yield and some important agronomic traits of ...** - yield and some important agronomic traits in seven promising lines of triticale using combined analysis of variance. 2terials and methods 2.1. sample preparation in this experiment, seven lines from preliminary analysis of yield and some important agronomic traits of iranian triticale genotypes in farmer conditions **the genetic diversity of triticale genotypes involved in ...** - the genetic diversity of triticale genotypes involved in polish breeding programs agnieszka niedziela, renata orłowska, joanna machczyńska and piotr t. bednarek* abstract genetic diversity analysis of triticale populations is useful for breeding programs, as it helps to select appropriate **intercropping canola and triticale to increase forage yields.** - intercropping canola and triticale to increase forage yields. chelsea walsh, clark neely and jack brown division of plant, soil and entomology science, university of idaho, moscow, id, 83844-2339 introduction canola is a promising rotation crop for wheat dominated regions of the pacific northwest. in **impact of different levels of salinity on performance of ...** - present study was designed to evaluate four promising triticale accession and to investigate the potentiality of these accession in respect to different level of salinity. material and methods the study was carried out in al-kahlediyah (marfaq), jordan in an area measuring approximately 350 m². **transferability of ssr markers among wheat, rye, and triticale** - therefore, triticale is a promising crop and a valuable genetic resource for transferring desirable genes, particularly disease-resistance genes, from rye to wheat. **evaluation of morphological diversity, mitotic instability ...** - progenies, triticale 4118 promising line and the cultivar navid were sown in a greenhouse based on a complete randomized design scheme with 3 replicates. the seeds of triticale and bread wheat collected from the research farm of college of agriculture, shiraz university, iran. total tiller and fertile tiller number, day to **preliminary evaluation of response to fusarium head blight ...** - contamination in wheat and triticale, were confirmed by independent comparative studies performed in poland with 32 winter triticale cultivars and 36 of winter wheat ones (goral et al., 2013). in order to reduce the mycotoxin content in triticale grain, very promising seems to be **cereal forages import ant new opportunities for the ...** - cereal forages import ant new opportunities for the western u.s. george fohnerl abstract small grain cereals are a major pasture and hay crop in the u.s. southern plains. fall-planted wheat has been the predominant cereal forage there, but fall-planted rye and triticale- are becoming increasingly important. **intercropping winter cereal grains and red clover** - intercropping winter cereal grains and red clover winter cereals planted in the fall accumulate excess nutrients not used during growth of the previous crop and use soil water that could otherwise contribute to nitrate leaching. planting cereal grains after soybean requires little to no tillage, which preserves soil organic matter. **tissue culture-induced genetic and epigenetic variation in ...** - tissue culture-induced genetic and epigenetic variation ... triticale (9 triticosecale spp. wittmack ex a. camus 1927) is a fertile amphiploid derived from chromosome ... hybrid breeding, which is one of the most promising avenues for triticale improvement (oettler et al. 2005). how- **winter triticale ad-17-b (2n=6x=42) - a main donor of ...** - winter triticale ad-17-b (2n=6x=42) - a main donor of genes for short stem, long spikes, high protein content in grain and progressing meiosis status of pmc. bulg. **salt-tolerant triticale (x triticosecale witt) cultivation ...** - salt-tolerant triticale (x triticosecale witt) cultivation in jordan as a new forage crop ... tolerance at al-khaledeya station and the most promising line was introduced to farmers' **straw using the ionic liquid and sulfate methods - mdpi** - energies article comparison of bioethanol preparation from triticale straw using the ionic liquid and sulfate methods

małgorzata smuga-kogut 1, bartosz walendzik 2, daria szymanowska-powalowska 3,* , joanna kobus-cisowska 4, janusz wojdalski 5, mateusz wieczorek 6 and judyta cielecka-piontek 6 1 department of agrobiotechnology, faculty of mechanical engineering, koszalin university of technology, **economic effects of triticale production on acid soils** - according to many researches, the triticale is a plant species with a high genetic potential for yield and favourable nutritive values so that's why it is considered a promising plant species (borojević, 1981, cvetkov, 1982, Đokić, 1988). according to the results of impiglia (1987), triticale has modest requirements in relation to **food applications of oat, sorghum, and triticale protein ...** - oat, sorghum, and triticale protein products offer considerable potential as food supplements. each has special characteristics applicable to improved food product development. high protein or high lysine lines of these grains have been developed in recent years. oat, sorghum, and triticale protein fractions **assessment of the impact of ecological factors on yield ...** - grain yield and quality in 25 triticale genotypes (including 20 promising line, two candidate and 3 varieties) tested in two seasons (one normal, second affected from cold and drought damage), and (2) evaluate the relationships among genotypes and traits to identify appropriate triticale genotypes for registration in southeastern anatolia. **idrc-024e macint 11251 triticale - citeseerxtu** - triticale research program in the united kingdom r. s. gregory 61-67 progress in the development of triticale in canada e. n. larter 69-74 ... the variety "bókoló" looks very promising. cooperation has been established between research workers in poland, czechoslovakia, and bulgaria. **molecular and agronomic assessment of genetic diversity ...** - molecular and agronomic assessment of genetic diversity and hybrid breeding in triticale dissertation ... triticale is of relatively small importance compared to the major cereals (maize, wheat, barley) in europe, it claims a permanent market share. ... strategy could be optimized by concentrating on few but the most promising hybrid ... **correlation of micro sodium dodecyl sulfate sedimentation ...** - correlation of micro sodium dodecyl sulfate sedimentation test and bread making quality traits in hexaploid triticale (x triticosecale wittmack) djatchouk t^{*} • kibkalo ia • pominov av • italianskaya yuv • safronova nf department of biotechnology, agricultural research institute for south-east region of russia, toulaiikova, 7, saratov ... **international journal of chemtech research - sphinxsai** - and horizontally as well as increasing the production of bread by mixing of wheat flour with corn or triticale flour. triticale is a promising crop used as food material for human and feed for animals throughout the world and could be employed as possible alternative to wheat under egyptian condition. **proficiency of biplot methods (ammi and gge) in the ...** - triticale cultivation in the world has shown an increase of over 40% in the last a decade years. the area of cultivation of triticale is 3.8 million ha, and the production is around 14.7 million tons in the world, and this rate is increasing day by day (anonymus 2; ayalew et al., 2018). **registration of 'willow creek' forage wheat** - four times. forage trial entries included promising cultivars or lines of wheat, triticale, spelt (*triticum aestivum* l. subsp. *spelta* l. thell.), and barley. trial entries and test locations varied considerably each year due to limitations in person-nel or resources but were uniform within years. **screening and evaluation of full season annual forage ...** - peas and soybean are the promising annual legumes. foxtail millet, sorghum and sorghum-sudan performed the best of the annual warm-season grasses. barley, oat and triticale are the promising annual cool-season grasses, and among the brassicas, cabbage and radish produced well. the variability in **winter annual crops for forage - usda** - winter annual crops for forage j. l. moyer, v. martin1, and b. kindiger2 summary early-cut total cereal forage yields, which simulate grazing, were usually highest for one or more of the rye cultivars. a single late cutting in 2007 produced best yields from two **potential of spring barley, oat and triticale intercrops ...** - nutritional values of different forages match up with beef cow needs. studies to identify promising barley (gill et al., 2013a) oat (gill et al., 2013b), and triticale (gill & omokanye, 2016) varieties for beef cattle production systems have been conducted in the pc region of alberta. the objectives of this study were to compare the **improving barley and triticale feed - beef cattle research ...** - improving barley and triticale feed (page 1 of 2) beef cluster funding will be directed towards the disease nursery activities being conducted through aafc brandon. implications in addition to promising new sources of germplasm, over 2000 potential new lines and crosses will be made and screened each **effects of mixture rates and cutting dates on the forage ...** - from the pure triticale sowing but the lowest (0.98 tonnes/ha) was from 75% vetch + 25% triticale mixture (table 1). conclusion the results showed that the triticale was a promising crop component in the annual legume + cereal mixtures for forage as well as hay production during the winter period of cukurova. triticale producing even higher **crop soil news - advancedagsys** - winter triticale has a major role in forage production across the whole northeast and canada. there are some very promising new varieties coming that with normal rainfall will boost yields. there are mold and may allow for a slightly reduced seeding rate due to the optimum fall growth. and finally, **research article open access analysis of t-dna integration ...** - immature embryo has proven to be the most promising [4-7]. the earliest reported stable transgenic triticale plants relied on the biolistic treatment of immature embryo scutella [8]. a similar approach targeting haploid embryo-like structures resulted in only the transient ex-pression of the transgene and no adult plants were regenerated [9]. **studies on potassium nutrition of triticale** - triticale cultivation on a large scale and evaluate its characters. thus, kudryavtseva (1977) reported from u.s.s.r. that the mexican forms of triticale were promising for the country owing to their resistance to lodging, larger number of grains per ear and good ecological adaptability. in alaska (u.s.a.),

wooding et al. (1977) found triticale **mitotic and meiotic behavior of rye chromosomes in wheat ...** - and hexaploid triticale (aabbrr), as visualized by genomic in situ hybridization. the results indicated that 31 of the total lines contained ... crop is a promising genetic resource for wheat improvement due to its numerous agronomical advantages, including resistance to stripe rust, powdery mildew and several pests, cold tolerance, **welcome to phillips county - aboutusuextension** - statewide trials and reported that spring triticale is a promising crop. eric riley from montana farmers union provided an overview of the pasture range forage (prf) insurance program. prf insurance can be placed on pasture, rangeland, and forage that is owned or rented. brian warr, veterinarian from feedlot health in canada, discussed how ... **introduction of elite wheat line for cold regions of iran** - (2016) in testing triticale-promising line recommended et-83-18 new line could be replaced with "juanillo-92" as old cultivar under birjand and similar areas conditions of iran. the objective of this research was evaluation grain yield of winter wheat promising line "ewyt-c-91-4" and comparison with "haydari" as control and commercial **print issn 0255-965x; electronic 1842-4309 not bot horti ...** - *triticum*, promising triticale and bread wheat lines under drought stress and normal conditions is a common start-ing point in the selection of genotypes for use in breed-ing in dry environments (byrne et al., 1995; rajaram and van ginkel, 2001). *tritopyrum*-derived genotypes and bread wheat did not differ significantly in respect to har- **a.j. lozano del río, a. hernández sierra, r. gonzález ...** - triticale improvement and production 123 triticale in mexico has been a disappointment for breeders because almost 40 years of efforts have been ... it is a very promising alternative forage for the irrigated regions of the northern and central states of mexico including durango, coahuila, nuevo león, ... **effect of phosphorous, organic and sapropel amendments on ...** - effect of phosphorous, organic and sapropel amendments on lead, zinc and cadmium uptake by triticale from industrially polluted soils violina r. angelova department of chemistry, agricultural university ... chemical immobilization is a promising technique for decreasing the mobility of the ... **evaluation of beef cattle winter feeding systems in the ...** - triticale either as a monoculture or in blends with ryegrass as annual winter pastures has been evaluated for its forage production potential in recent years (myer et al., 2009, 2011). the objective of this study was to compare beef cattle winter feeding systems in the southeastern u.s. in terms of animal performance, forage **triple cropping can be a valuable waste management tool ...** - so far the results are promising. from a nutrient management perspective the benefits of triple cropping are obvious: if you in- ... the triticale harvest in april yielded 16 tons per acre, and four cuttings of sorghum/sudan plant- ... triple cropping can be a valuable waste management tool for dairies w-38 hoard's west. trogen the sorghum ... **evaluation of value-added components of dried distillerâ ...** - evaluation of value-added components of dried distiller's grain with solubles from triticale and wheat amera gibreel, james r. sandercock, jingui lan, laksiri a. goonewardene, angela c. scott, ruurd t. zijlstra, **establishment of alleycropped hybrid aspen "crandon" in ...** - crops such as winter triticale which complete their growth cycle early in the summer and therefore are expected to exert minimal competition on establishing trees. in addition, ... (*populus alba* l. × *p. grandidenta* michx.) appears especially promising, due to both its high productivity and its adaptability to sloping marginal lands [7]. **effect of nitrogen and ecological factors on quality of ...** - suggesting a promising use for the production of human foods (tÄht et al., 1998; varughese et al., 1996). low gluten content, poor gluten strength and high levels of alpha-amylase activity caused mainly by pre-harvest sprouting generally result in triticale flour with weak dough that is unsuitable for many bread-making operations. **iranian journal of field crop science** - iranian journal of field crop science, vol. 45, no. 2, summer 2014 1 effect of arbuscular mycorrhiza and bradyrhizobium japonicum on soybean yield and yield components under water stress mohammad ali aboutalebian1 and mahboubeh khali12 1.
