## Winter Sleep

**lesson 3 a long winter nap - eps10v. epsbooks** - as winter approaches, the groundhog becomes so fat it can hardly move. it prepares its nest and closes off the openings of the tunnels that lead down to it. when it starts to feel drowsy, it makes itself comfortable and falls into a long, deep sleep. this sleep can last up to eight months. **name: hibernation - super teacher worksheets** - name: \_\_\_\_\_ hibernation by kimberly m. hutmacher hibernation is a word used to describe an animal that passes the winter months in a sleep-like state. certain animals do this because they otherwise couldn't survive the severe cold and lack of food through the season. common hibernators include **temperature changes and winter sleep of bats** - disturbance as possible, and then allowed to go to sleep again without being fed. the respiratory exchanges were measured by means of the haldane-pembrey method, the sleeping bat being hung carefully from the stopper of a large beaker, through which dry CO<sub>2</sub>-free air was then passed. the carbon dioxide and water given off were collected and **ceylan's winter sleep: from ambiguity to nothingness** - ceylan's winter sleep: from ambiguity to nothingness asli daldal aslidaldal@yahoo abstract nuri bilge ceylan is a puzzling filmmaker who started his career as a photographer and initially made films **get ready for winter passage - images.pcmac** - get ready for winter dormice are getting ready for a long winter sleep. they eat a lot of food. the food helps them survive, or live, through the winter. good night, sleep tight! the dormouse can sleep for six months during the winter. that long sleep is called hibernation (high-ber-nay-shun). during hibernation, **survivor: minnesota winter - fws** - torpor is a state of deep, temporary sleep with alert stages for eating, drinking and going to the bathroom. animals that spend parts of the winter in torpor might wake up and move around on a warm winter day, if disturbed, or if especially hungry. animals that spend much of their winter in torpor are skunks, raccoons and badgers. **treating snoring s 22 8.45am - 4.30pm & sleep apnea with ...** - dr sara winter the psychology behind good sleep dr john wilkinson somgauge protrusive bite registration workshop dr john packer dental sleep medicine in the dental practice dr sara winter is a clinical psychologist with over 10 years experience working in the field. sara completed her phd in the area of sleep disorders and health behavior change. **a long winter s nap - wildlifeate.nh** - use winter dens known as hibernacula, mostly caves and mines, but one species prefers attics and barns. after a summer of performing insect control and increasing their body weight by up to 25 percent, these bats seek out caves or mines for a long winter's nap; some will travel up to hundreds of miles away for their winter sleep. **winter: where are our robins? - journey north - sleep at night** in flocks. in summer, robins drive other robins off their territory. they need all the space and food for their own babies. robins do not flock in summer. 3 4 ©photo fran ludwig ©photo r. westmoreland winter robins are feeding winter robins are flocking **sleep - reading rockets** - winter sleep the darkness of night is a sign to us that it is time to rest. in denise fleming's book, time for sleep, all the animals recognize signs in nature that tell them it is time to rest for the winter, or hibernate. ask your child **winter dreams - washington state university** - winter dreams. ii now, of course, the quality and the seasonability of these winter dreams varied, but the stuff of them remained. they persuaded dexter several years later to pass up a business course at the state university--his father, prospering now, would have paid his way--for the precarious advantage of **natural sleep and its seasonal variations in three pre ...** - report natural sleep and its seasonal variations in three pre-industrial societies highlights d preindustrial societies in tanzania, namibia, and bolivia show similar sleep parameters d they don't sleep more than "modern" humans, with average durations of 5.7-7.1 hr **adaptations designs for survival** - adaptations - designs for survival from shoreline tidepools to its deep dark bottom, the hudson river is a wild place. here one can discover many kinds of plants and animals, each with its own adaptations for life in and along the river. adaptations help organisms do the things they must do to survive in their environments. living things **winter sleep - s3azonaws** - winter sleep bears some similarities with climates, which painted the portrait of a couple, and which came after two films that might be called noir thrillers, three monkeys and once upon a time in anatolia. but compared to climates, it's a much broader work, like a great novel. from
