wireless communications - university of california, davis - future systems indicates that much research remains to be done to make the wireless vision a reality. 1.1 history of wireless communications the first wireless networks were developed in the pre-industrial age. these systems transmitted information over line-of-sight distances (later extended by telescopes) using smoke signals, torch signaling, **wireless communications - wireless systems lab** - wireless communications is, by any measure, the fastest growing segment of the communications industry. as such, it has captured the attention of the media and the imagination of the public. cellular systems have experienced exponential growth over the last decade and there are currently around two billion users worldwide. indeed, **design of a secure wireless communication system** - 5 design of a secure wireless communication system many of the techniques used on microsemi dpa-resistant fpgas are licensed from cryptographic™ research inc.
